

Lever Style with 30° Grip for Quartz Boat

GLA offers a full line of the latest in ergonomically designed handles for critical handling of quartz and silicon carbide boats. These tools incorporate improvements based on more than 5 years experience of heavy usage in the FAB.

Low particle generation materials prevent wafer contamination. Vespel, PEEK, and Ultem are used for high temperature applications. Three standard grip angles are available; 15°, 30°, and 45°.

Handle Models & Boats

Lever	Quartz
Tine	Quartz & SiC
Hook	Quartz & SiC
Grip	Quartz & SiC
Clamp	SiC
